

# Visual Memory Game

Anurag Misra

# INTRODUCTION

- ▶ Your soul is bereft and you must lead the sacred stone to its final destination by surpassing all hurdles which involve your visual and memory skills.
- ▶ The game does not involve a specific mission. You clear all the three discrete specifically defined missions to reach the place of the sacred soil to return the sacred stone
- ▶ The first part involves visual, logical, and memory skills
- ▶ The second part involves mathematical, and memory skills
- ▶ The third part involves memory skills

## LEVEL 1

- ▶ Pass through the ring in the center dodging the spheres of destruction, protecting the sacred stone

## LEVEL 2

- ▶ Press arrows keys equivalent to  $\text{IN}\{0,1,2,3,4\}$  denoting numbers. Press such that sum is divisible by the number indicated. If at the end your sum is divisible by number indicated you pass else you are doomed.
- ▶ The higher your sum the higher your score!

## LEVEL 3

- ▶ Clear the randomly generated maze to reach the “FINAL DESTINATION” and discharge the stone to complete the game

# SCORING CRITERIA

- ▶ TIME
- ▶ YOUR SUM IN LEVEL 2
- ▶ SOME FEATURES CURRENTLY IN DEVELOPMENT

# LIBRARIES USED

- ▶ FREEGLUT
- ▶ GLEW32

# PROBLEMS FACED

- ▶ Generating terrain(not completed)
- ▶ Loading .obj files
- ▶ Configuring the camera and navigation to different needs of the game
- ▶ Collision Detection
- ▶ Configuring textures with Phong Shading Model
- ▶ Multiple Textures

QUESTIONS INVITED!

THANK YOU
